

## E-STAIN

### Color Cards

Reactive stains react with chemicals within the concrete to form lasting color. The initial color of the stain may not match the final color as a reaction has not yet completed. Disclaimer: This digital color card should be used as a general guide, not a definitive indicator of final color. Shades and hues can vary depending on screen settings. When planning a project, consult a physical color card for a better indication of potential color. Create a representative mockup before any project to better account for the effects of conditions, material, and techniques that may alter the final appearance or color.

|                                    |                                     |                                    |                                  |                                     |
|------------------------------------|-------------------------------------|------------------------------------|----------------------------------|-------------------------------------|
|                                    |                                     |                                    |                                  |                                     |
| ES-100 Evergreen (gray concrete)   | ES-200 Blue Di Mare (gray concrete) | ES-300 Moss (gray concrete)        | ES-400 Bronze (gray concrete)    | ES-500 Sunset (gray concrete)       |
